

QUALITY & ENVIRONMENTAL POLICY

Top Management of Titan Firefighting Company, S.L. and Aviation Trade Europe, S.L., aware of the commitment it undertakes towards its customers, has established as a primary objective the implementation and maintenance of an Integrated Management System based on continual improvement, compliance with applicable requirements, and the satisfaction of customers and other interested parties.

Through this commitment, both companies seek to strengthen their external recognition as leaders in their sector, not only for the quality of the services they provide, but also for the continual improvement of their working methods and their commitment to excellence in customer service.

Top Management shall ensure that the Integrated Management System complies with all applicable legal and regulatory requirements, as well as with commitments relating to environmental protection and safety, while pursuing excellence in firefighting and aerial spraying services, the training of mechanics and pilots, the sale and maintenance of aircraft, and the distribution of aircraft spare parts.

All activities shall be carried out in accordance with the requirements of **UNE-EN ISO 9001:2015** and **UNE-EN ISO 14001:2015**, as well as with the achievement of the established quality and environmental objectives, which shall be guided by the key principles of this Policy:

- **Comply with all legal, regulatory, environmental, and safety requirements** across all facilities and activities. Furthermore, Top Management is committed to identifying and assessing risks, as well as legal and environmental aspects that may affect organizational processes, occupational health and safety, and the environment, with the objective of eliminating or minimizing their impact whenever technically and economically feasible.

Given that firefighting activities are essential to safeguarding the natural environment of our forests and rural areas, the Company is firmly committed to complying with all applicable environmental legislation and regulations and to going beyond compliance by establishing additional environmental commitments and initiatives within the organization.

- **Improve safety** in flight operations and throughout all organizational processes through the continual improvement of safety management systems and the promotion of a positive safety culture. The integration of Occupational Risk Prevention is the responsibility of every employee. Therefore, Top Management, middle management, and operational personnel shall comply with established procedures and guidelines and actively contribute to identifying and implementing improvements to ensure that workplaces become safer every day.
- Review and assess improvement opportunities proposed by interested parties and communicate the decisions taken, **striving for excellence in management, a positive safety culture, economic efficiency, and environmental responsibility**

- Strengthen customer focus by consistently meeting the requirements, needs, and expectations of customers and other interested parties, including public authorities and society as a whole, with the objective of achieving the highest levels of satisfaction.
- *Apply the principles of **continuous improvement** to all organizational processes through systematic planning, performance monitoring, and the implementation of improvements and innovations, both within individual activities and across the organization as a whole.*
- *Promote the competence, qualification, and continuous development of all personnel, ensuring that safety, operational excellence, management efficiency, and environmental responsibility remain core principles of the organization.*
- *Manage the organization through a process-based approach to ensure the effectiveness, efficiency, and continuous improvement of all activities and processes.*
- *Manage the organization through a process approach*
- *Use this Integrated Quality and Environmental Policy as the framework for establishing and reviewing quality objectives and environmental objectives and targets*

This Quality and Environmental Policy is communicated to all personnel within the organization and is made available to all interested parties

Therefore, this Quality and Environmental Policy applies to all personnel of **Titan Firefighting Company S.L.** and **Aviation Trade Europe S.L.**, who are expected to understand, embrace, and actively support its principles. Every employee is responsible for implementing the Policy, complying with the quality requirements relevant to their activities, and identifying and promoting opportunities for the continual improvement of the Management System.

This Policy shall be reviewed by Top Management whenever considered necessary to ensure that it remains current, relevant, and effective.

In addition to this Quality and Environmental Policy, the Company has established specific policies to provide clear guidance and direction in areas of particular importance, including Operational Safety in firefighting operations and pilot training, mechanic training, aircraft maintenance, and Criminal Compliance and Anti-Bribery.
